The changes in the tax landscape are also geared to address the unique challenges that arise from digitalization of the overall economy. With more and more banks going digital, the changes in the tax landscape would directly affect banks and financial institutions. CIBAFI and PwC are delighted to host a webinar where financial services experts will focus on the critical changes in the international tax landscape which are of significant relevance to banks and financial institutions.

Join this live and interactive session focusing on the tax and transfer pricing implications for Islamic financing, an interplay between BEPS 2.0 and digital banking and the importance of tax function for enterprises in the Middle East region.
